	PROJECT TITLE Outline							
25	202003032	Governance	Local Governance	Spanish, English		3yrs	1	<input type="checkbox"/>
	Capacity Building of Local Governments for Development with Community Participation			This course provides opportunities for officers of municipalities as well as of central governments responsible for regional development to learn experience and approaches regarding local governance and community participation in Japan, and to be able to effectively play a role in regional development in their own countries.				
26	202003035	Governance	Local Governance	English		1yr	1	<input type="checkbox"/>
	Local Governance			This program is designed for middle-ranking officials of central and local government responsible for local administration. It covers a wide range of subjects regarding the systems and practices of local administration, finances and taxes of Japan. By comparing Japan's cases to their own, participants will analyze issues of their local government systems and propose applicable solutions.				
27	202003046	Governance	Legal and Judicial Development	English		3yrs	1	<input type="checkbox"/>
	Criminal Justice Response to Vulnerable Groups (e.g. Reoffender, Female and Child Victims) Towards Inclusive Society			This program deals with criminal justice issues on: (1) preventing reoffending; and (2) female and child victims etc. Towards the development of an inclusive society, this program takes a practical approach to addressing difficulties which offenders face in their social reintegration and adequate ways to protect and treat female and child victims etc. involved with the criminal justice system. The targets of the program are: the police, prosecution, courts, prison, probation, other institutional and community corrections services, and other criminal justice organizations with similar responsibilities. Participants are expected to share their knowledge and skills and to strengthen their capacity to build an inclusive society in their respective countries. This program will be organized by UNAFEI, an institution known worldwide for its high-quality international training courses and seminars in the field of crime prevention and criminal justice.				
28	202003052	Economic Policy	Public Finance (expenditure management)	English		1yr	1	<input type="checkbox"/>
	Collaborative Program between WB and JICA : Managing Risks from Contingent Liabilities and Government Debt			To present practical methods for striking the right balance in the cost-risk tradeoff of each government debt portfolio, for reducing vulnerability caused by financial risks, operational risks, and contingent liabilities, JICA will host a program on government debt management focusing on contingent liabilities in collaboration with the World Bank.				
29	202003059	Gender and Development	Gender and Development	English	Fix	3yrs	2	<input type="checkbox"/>
	Promotion of Networking among ASEAN Countries on Anti-Trafficking in Persons			Since anti-Trafficking in Persons has become serious in Asian countries, it must be tackled promptly and accurately. However, it is impossible to tackle with it by only one country. Establishing network as a wide area issue is essential. This course aims to enhance mutual understanding on anti-Trafficking in Persons especially prevention and protection and to promote more effective regional cooperation.

APPLICATION FORM FOR GROUP AND REGION-FOCUSED TRAINING PROGRAMS IN JAPANESE FISCAL YEAR 2021

Category II: These training courses are newly established or are on-going courses without fixed allocation and are widely accepting new participants

Country: THAILAND

Maximum Number of Requests : 41

No.	Project Number	Sector	Sub-Sector	Language	Fixed Allocation	Remaining Period	Desired No. of Participants	Request
	PROJECT TITLE							
Outline								
30	202003060	Gender and Development	Gender and Development	English		1yr	3	<input type="checkbox"/>
	Gender and Diversity in Disaster Risk Reduction							
Each participant is expected to understand how to strengthen DRR through women's participation by learning problems and good practices from Japan's efforts of related organizations and disaster experience and by sharing examples by participant countries on DRR from perspectives of high risk groups of the society (women, children, the elderly, persons with disabilities, etc.)								
31	202003064	Evaluation	Evaluation	English		2yrs	1	<input type="checkbox"/>
	Capacity Building for Improved "Project Evaluation" Design, Implementation and System Institutionalization							
Project evaluation is highly important to conduct better project formulation and project implementation by utilizing lessons obtained from past projects, and to ensure accountability to stakeholders of projects. Through this KCCP based on JICA's project evaluation, participants are expected to enhance their capacity by learning design, implementation methodologies and system of the project evaluation.								
32	202003076	Agricultural Development	Distribution, Processing, Export Promotion	English		1yr	1	<input type="checkbox"/>
	Rural Development through Creating Agricultural Value Chain (Value Addition to Livestock Products)							
Farmers are facing not only technical problems but also limited choices to sell products with low profit, because of immature processing and distribution systems. This course aims to plan rural development from the viewpoint of 'Food Value Chain' which promotes farmers to create value-added by involving processing and distribution. Main case study of 'Milk Chain' provides highly applicable knowledges.								
33	202003082	Agricultural Development	Agricultural Development	English		2yrs	1	<input type="checkbox"/>
	Leader Development Program for "Food Value Chain" on Private-Public-Academia Collaboration							
Food Value Chain (FVC) strengthening is one of the basic strategies in the field of agricultural and rural development, and it requires human resource development related to FVC for both in quality and in quantity in each country, furthermore leader development is an urgent matter. This program trains the future leaders from each ASEAN country where FVC strengthening is active. While making the powerful influence as the leader in Private, Public and Academia sectors, academic career and ability are required. So that this program adapts a component including collaboration with the international student program as well, and it should be implemented with the consideration for matching between future candidate students and universities.								
34	202003086	Agricultural Development	Animal Health Laboratory / Livestock	English		3yrs	1	<input type="checkbox"/>
	Improving Safety and Quality Control of Livestock Products Focusing on Milk, Meat and Eggs							
This course provides the knowledge of hygiene and quality management in a series of process of production, processing and distribution of animal-sourced foods. Targeted livestock are cattle, swine and poultry.

No.	Project Number	Sector	Sub-Sector	Language	Fixed Allocation	Remaining Period	Desired No. of Participants	Request
	PROJECT TITLE							
Outline								
35	202003087	Agricultural Development	Animal Health Laboratory / Livestock	English		2yrs	1	<input type="checkbox"/>
	Policy Planning and Project Management on Livestock Industry Development for Livestock Officials							
Many developing countries have national development plans of agriculture, livestock industry. However, few countries have systems of human resources development. This program aims at making middle level officials capable to ensure that national development plans contribute development of national livestock industry.								
36	202003094	Agricultural Development	Fisheries	English		3yrs	1	<input type="checkbox"/>
	Value-Chain Development for Sustainable Use of Fisheries Resources							
This program aims at learning ways how to raise producers' income through regional resource utilization and sixth sector industrialization as an effective means of fisheries resource management. Recently in Hokkaido region, industry, government and academia are cooperating for promoting innovation in its competitive fields and working for an increase of added value by means of developing fishery value chain. Participants from respective countries can learn knowledge of sustainable use of fishery resources and value chain development.								
37	202003097	Rural Development	Rural Infrastructure Maintenance	English, French		2yrs	2	<input type="checkbox"/>
	Integrated Agriculture and Rural Development through the Participation of Local Farmers							
In the process of agricultural development in Japan, while the government has implemented agricultural infrastructure projects, efforts for developing rural areas through farmers' participation also have been enhanced. This course provides the opportunities to learn about the knowledge, techniques and cases of participatory agriculture and rural development in Japan.								
38	202003116	Agricultural Development	Agricultural Service	English, Spanish		3yrs	3	<input type="checkbox"/>
	Human Resource Development on Private-Public-Academia for Agricultural and Rural DX / Smart Food Chain Co-creation							
In rural areas of developing countries, it is required to increase farmers' income through improving agricultural productivity and added value of agricultural products. For that purpose, it is necessary to disseminate correct farming knowledge and technology to farmers and access to financial services necessary for purchasing agricultural input materials. Currently, due to the rapid development of information and communication technology, and also impact of COVID 19, introduction of smart technology is also rapidly progressing in each food value chain process such as breeding, cultivation, processing/distribution and consumption. This training course is aimed at "smart food chain (SFC) co-creation" between Japan and developing countries, and intended to contribute for agricultural and rural development in developing countries by Overseas diffusion of Private-Public-Academia technologies and experience of SFC creation utilizing local resources in Japan.								
39	202003126	Private Sector Development	Trade and Investment	English		2yrs	2	<input type="checkbox"/>
	Security Export Control							
This course will focus on the objectives, methods, and Japanese measures of security export control, thereby enhancing participants' understanding of the necessity of security export control as well as how it promotes further economic growth rather than impede trade and investment. The course aims to facilitate the development of a strategic security export control system in participating countries.

	Strengthening of Cooperation Among Organizations Against Cyberattacks							
<p>Cybersecurity risk is increasing along with the progress of the digital economy. It is difficult to defend against cyberattacks singlehandedly as threats rapidly diversify, advance and proliferate within a short period. It is therefore extremely important to build a network of information sharing within several entities. This program aims to offer knowledge and skills for establishing and managing information sharing organizations (i.e. ISACs: Information Sharing and Analysis Centers) for entities such as critical infrastructure operators to effectively exchange and analyze information on cybersecurity.</p> <p><i>*In this program, we introduce "Active Learning" approach to promote knowledge co-creation among participants.</i></p>								
47	202003152	Information and Communication Technology (Utilization of ICT)	Information and Communication Technology	English		3yrs	1	<input type="checkbox"/>
	Japan-US Industrial Control Systems Cybersecurity Training for Indo-Pacific Region							
<p>Cyberattacks against the energy sector including power systems (power plants, substations etc.) are also increasing in the Indo-Pacific region, thus immediate action is required with the collaboration between the public and private sector. In this context, this program exclusively targets electricity and gas regulatory authorities / operators and industry associations. Experts from Japan, the United States and Europe are invited to introduce the latest trends of the threats and necessary security measures and processes. The program aims to enhance capacity on policy-making, implementation and upgrading countermeasures for their home countries' security, by information sharing and networking among lecturers and participants from other countries.</p> <p><i>*In this program, we introduce "Active Learning" approach to promote knowledge co-creation among participants.</i></p>								
48	202003160	Natural Resources and Energy	Energy Conservation	English		2yrs	1	<input type="checkbox"/>
	Promotion of Energy Efficiency and Conservation							
<p>In order to promote low-carbon socio-economic development, which is a global goal, the training program will be conducted systematically through lectures, practical training, and site visits about Japan's energy-saving policies, energy-saving technologies, and energy-saving cases in order to promote energy efficiency, in a course classified into three sectors: A) industry (B) Commercial and Residential (C) transportation and policy.</p>								
49	202003167	Natural Resources and Energy	Renewable Energy	English		2yrs	1	<input type="checkbox"/>
	Stabilizing Power Systems to Introduce Various Kinds of Renewable Energy							
<p>Recently, as a result of dramatic decline of variable renewable energy (VRE) and against the backdrop of global initiative to limit carbon emissions, many countries are starting to accelerate VRE development. However, in many countries, the electric power system is not ready to accommodate large amounts of VRE. This program will introduce the impact of VRE on the stability of the power system and the specific measures to stabilize the power system.</p>								

SHORT LIST

APPLICATION FORM FOR GROUP AND REGION-FOCUSED TRAINING PROGRAMS IN JAPANESE FISCAL YEAR 2021

Category II: These training courses are newly established or are on-going courses without fixed allocation and are widely accepting new participants

Country: THAILAND

Maximum Number of Requests : 41

No.	Project Number	Sector	Sub-Sector		Language	Fixed Allocation	Remaining Period	Desired No. of Participants	Request
	PROJECT TITLE Outline								
50	202003174	Natural Resources and Energy	Renewable Energy		English		3yrs	1	<input type="checkbox"/>
	Mass Integration of Variable Renewable Energy and Demand Side Energy Management Countries where large volume of VREs are being or will be integrated into their power network systems in future need to take appropriate technical and institutional countermeasures and change business model of power supply to keep stability of electricity delivery. Such technology includes management of power network operation including forecasting demand/supply, Energy Management System (EMS), Demand Side Management (DSM), Virtual Power Plant (VPP) or other technologies. For institutions responsible for policy and planning on overall power network system as well as transformation to future decentralized / digitalized systems, learning opportunities for methodologies, policy formulation and technical standard for above issues are important								
51	202003175	Transportation	CapacityDevelopment for Transport Sector		English		1yr	1	<input type="checkbox"/>
	Practical Technology on Intelligent Transport System (ITS) Traffic demand in the developing countries is rapidly increasing, and it is necessary to expand road capacity and enhance safety. ITS assists to enhance the efficiency and safety of existing road network using real-time information. This program is aimed to enhances the action plan and the practical capacity to introduce ITS in each country. <i>*In this program, we introduce "Active Learning" approach to promote knowledge co-creation among participants.</i>								
52	202003177	Transportation	CapacityDevelopment for Transport Sector		English		1yr	1	<input type="checkbox"/>
	Traffic Safety Participants shall learn the overview of the experiences, knowledge and countermeasures for traffic safety accumulated in Japan through lectures/site visits. The subjects are (1) Traffic safety policy, (2) Traffic enforcement including traffic police system, collection and analysis of accident data, and driving license system, (3) Traffic safety education and campaign, (4) Traffic safety facilities, (5) Operation management of passenger and cargo transport company, etc.								
53	202003178	Transportation	Transportation		English		1yr	1	<input type="checkbox"/>
	Sustainable Port Development and Planning (For Port Engineer) This program provides lectures regarding development and planning of "ports and the waterfront area including industrial location" ranging from the basics of civil engineering to the outcomes of leading-edge research. Through session of case study of ports and the waterfront areas, participants will create action plans after lectures and inspections and will then presnt and discuss such action plans.								
54	202003181	Transportation	CapacityDevelopment for Transport Sector		English		1yr	1	<input type="checkbox"/>
	Road Administration Road development has considerable social and economic impacts in developing countries with insufficient social infrastructure. This Knowledge Co-Creation Program aims to develop the capacity of planning, developing, administrating and maintaining roads for the government technical officials involved in road administration. <i>*In this program, we introduce "Active Learning" approach to promote knowledge co-creation among participants.</i>								

SHORT LIST

APPLICATION FORM FOR GROUP AND REGION-FOCUSED TRAINING PROGRAMS IN JAPANESE FISCAL YEAR 2021

Category II: These training courses are newly established or are on-going courses without fixed allocation and are widely accepting new participants

Country: THAILAND

Maximum Number of Requests : 41

No.	Project Number	Sector	Sub-Sector	Language	Fixed Allocation	Remaining Period	Desired No. of Participants	Request
	PROJECT TITLE Outline							
55	202003182	Transportation	CapacityDevelopment for Transport Sector	English		2yrs	1	<input type="checkbox"/>
	Maritime Law Enforcement This course aims that participants learn comprehensive knowledge and techniques for maritime law enforcement through lectures, visits, and practical experiences based on cooperation from Japan Coast Guard (JCG). A target group is a commanding officer at an operational level and the period of the course is one month. The course includes lectures on international law/drag smuggling/ human trafficking, an observation of the JCG air base, investigations of suspicious vessels, and practical exercises of scientific criminal investigation, which are necessary to strengthen maritime law enforcement.							
56	202003184	Transportation	CapacityDevelopment for Transport Sector	English		2yrs	1	<input type="checkbox"/>
	Comprehensive Bridge Engineering This program will provide comprehensive bridge engineering such as design of bridges, construction/construction supervision and maintenance/repair of various types of bridges through case study and site visit in Japan.							
57	202003187	Transportation	Inter-national/-regional Transportaion	English		3yrs	1	<input type="checkbox"/>
	Development of the Sustainable and Reliable Logistics System in Asian Region This course aims at assisting, and encouraging, governments to take policy actions 1) to promote more efficient and green logistics system and 2) to make cold chain logistics system more reliable. It includes lectures on the current status of logistics system / policy in Japan and Asian countries, field visits on a variety of real examples of logistics services, etc.,							
58	202003188	Transportation	Inter-national/-regional Transportaion	English		1yr	1	<input type="checkbox"/>
	Strategic Port Administration and Management This program aims to improve capabilities of strategic port administration, and proper port management and operation by formulating an Action Plan for port related problems in respective countries. In this training, the trainees deepen their knowledge through lectures and site visits on how to improve the efficiency of port maintenance/operation management, which is an interface for marine logistics, which is essential for economic development. By organizing the facing various problems in their country reports, and creating an action plan while consulting with an external consultant to consider the comprehensive solution on their own, the capacity of the relevant organizations to improve strategic port administration and operational management is developed.							
59	202003192	Transportation	Transportation	English		3yrs	1	<input type="checkbox"/>
	Bridge Maintenance This course is added to monitoring activities after a series of program in Japan. Participants will understand the bridge maintenance system carried out in Japan and, the bridge maintenance skills of will be improve by means of the practicaltraining program for inspection, evaluation, and repair of various types of bridges.							

SHORT LIST

APPLICATION FORM FOR GROUP AND REGION-FOCUSED TRAINING PROGRAMS IN JAPANESE FISCAL YEAR 2021

Category II: These training courses are newly established or are on-going courses without fixed allocation and are widely accepting new participants

Country: THAILAND

Maximum Number of Requests : 41

No.	Project Number	Sector	Sub-Sector		Language	Fixed Allocation	Remaining Period	Desired No. of Participants	Request
	PROJECT TITLE								
	Outline								
60	202003193	Transportation	National Transportation				2yrs	1	<input type="checkbox"/>
	Road Maintenance				Russian, English, French			Must	
This course mainly targets engineers who are engaged in road maintenance. It contributes to improve their knowledge, experience and technique for appropriate road maintenance, especially planning skills (including asset management) through lecture, site visit and discussion etc. They are expected to identify the issues and formulate feasible action plan for the solution.									
61	202003194	Transportation	Urban Transportation				1yr	2	<input type="checkbox"/>
	Urban Railways Management				English				
The importance of urban railways is increasing to solve various issues brought by urbanization (e.g. traffic congestion, pollution). In order to cope with high-speed urbanization, it is a pressing issues for urban railway companies and relevant organization to realize safer and more efficient management of the urban railways. Based on the lectures and discussions in the program, each participant formulates action plan(s) which will contribute to better management of urban railways. *In this program, we introduce "Active Learning" approach to promote knowledge co-creation among participants.									
62	202003195	Transportation	Urban Transportation				1yr	1	<input type="checkbox"/>
	Level Up Training for Operation and Management Organization of Urban Railways				English				
The program aims to level up the capacity of the railway operators in developing countries focusing on the practices of each competence group. The participants are expected A) to acquire the skills for operation and maintenance of railway from the lectures and experiences, B) to share and utilize their acquisitions in their own countries and C) to get promoted the importation of railway technology in Japan.									
63	202003197	Transportation	CapacityDevelopment for Transport Sector				3yrs	1	<input type="checkbox"/>
	Maritime Safety and Security Policy Program				English				
Sea lane stability requires coastal states to address maritime issues responsibly. Development of international maritime norm requires a formation of rule-of-law based international understanding, this program provides an advanced education bridging practice/theory of maritime safety and security based on Japanese expertise, which will cultivate specialized abilities to draft or to improve own country's maritime policies.									
64	202003200	Urban/Regional Development	Regional Development				3yrs	1	<input type="checkbox"/>
	Build Back Better for Disaster Resilient Society Through Collaboration Between Local Community and Municipality				English				
This program focuses on the role of public administration in the process of reconstruction process from natural disaster, including industrial recovery, consensus formation between administration and civil society in order to build disaster resilient society applying the collective relocation plan, land-use plan and cooperation between administration and civil society in the realm of livelihood restoration and industrial development.									

SHORT LIST

APPLICATION FORM FOR GROUP AND REGION-FOCUSED TRAINING PROGRAMS IN JAPANESE FISCAL YEAR 2021

Category II: These training courses are newly established or are on-going courses without fixed allocation and are widely accepting new participants

Country: THAILAND

Maximum Number of Requests : 41

No.	Project Number	Sector	Sub-Sector	Language	Fixed Allocation	Remaining Period	Desired No. of Participants	Request
	PROJECT TITLE Outline							
65	202003201	Urban/Regional Development	Urban Development	English, Spanish	Fix	3yrs	1	<input type="checkbox"/>
	Urban Management for Sustainable Urban Development							
This program aims at developing participants' capacity not only urban but also its management by learning Japanese municipal's experience, Kitakyushu city which is famous an eco-friendly city adopting the concept of "Environmental future city" and " Environmental model city" for low carbon society. Furthermore, this course will introduce PPP projects involving private sector's finance.								
66	202003202	Urban/Regional Development	Urban Development	English		1yr	1	<input type="checkbox"/>
	Housing Supply Policy							
Rapid urbanization and population growth have caused increase of slum and poor living environment. Recently, it has become to be recognized as one of the critical issues which will impede sustainable development. In Sustainable Development Goals(SDGs 11) , they set a target for ensuring access for all to adequate, safe and affordable housing and basic services and upgrade slums by 2030. (target 11.1). In this program, participants will deepen understanding about the housing supply policy, exchange opinions on housing issues, and eventually formulate action plans to improve housing issues in respective countries.								
67	202003203	Urban/Regional Development	Urban Development	English		1yr	1	<input type="checkbox"/>
	Comprehensive City Planning							
The ever-growing populations in developing countries are over-concentrated in cities. However, infrastructure in these area has not been adequately developed to meet the pace of urbanization typified by expansion of people and economic activities and the spread of urban districts. This program aims to propose an comprehensive city planning system by learning Japanese system and conducting case study. *In this program, we introduce "Active Learning" approach to promote knowledge co-creation among participants.								
68	202003204	Urban/Regional Development	Urban Development	English		2yrs	1	<input type="checkbox"/>
	Urban Solutions - Urban Development Methods Including Land Readjustment for Rapidly-Growing Cities							
This program aims to find out the direction of solutions to problems and issues of urban problems caused by rapid growth of cities in the participating countries through Japanese experiences and practices regarding urban development. The program focuses on two themes of urban development, which are TOD(Transit Oriented Development) and redevelopment of densely populated areas in city centers, and is centered around case studies of local government practices in Japan. With the objective of newly developing urban areas or redeveloping existing inefficient urban areas, this program will introduce a comprehensive approach to urban development, including methods such as land readjustment and urban redevelopment. *In this program, we introduce "Active Learning" approach to promote knowledge cocreation among participants.								
69	202003207	Urban/Regional Development	Urban/Regional Development	English		2yrs	1	<input type="checkbox"/>
	General Management for Regional Development and Planning							
This course gives an opportunity to study crucial points that should be considered for the sustainable regional development as follows, (1)Efficient infrastructure development by united action of planning and implementation of regional development under the leadership of the central government (2)Empowerment of regional development planning to the municipalities under decentralization (3)Good examples of regional development by public-private partnership

Outline								
75	202003214	Urban/Regional Development	Other Urban &Regional Development Issues	English		2yrs	1	<input type="checkbox"/>
	Urban Public Transport (Railway, MRT, Bus, etc.)							
<p>This program introduces planning, construction, O&M of urban transport systems based on Japan's experiences in order to realize sustainable public transport systems. These themes will be covered in terms of coordination with urban development, selection of transportation modes, financing and public transportation policies. The programs is designed as more advanced stage of JICA's another KCCP "Comprehensive Urban Transportation Planning", which involves traffic analysis an demand forecast methods for elaborating masterplans of urban public transport systems. Furthermore, JICA offers more specialized KCEP, "Urban Railways Management" which focuses on urban railroad transportation. *In this program, we introduce "Active Learning" approach to promote knowledge co-creation among participants.</p>								
76	202003231	Environmental Management	Air Pollution/Acid Rain	English		1yr	1	<input type="checkbox"/>
	Capacity Building towards Air Quality Management							
<p>To reduce potential adverse impacts of air pollutants on human health and ecosystems in developing countries, proper air quality management is required at all levels. This project aims to develop capacity for air quality management based on scientific tools, including atmospheric monitoring, emission inventory and model simulation, making use of the knowledge and experiences that Japan possesses.</p>								
77	202003232	Environmental Management	Water Pollution	English		1yr	1	<input type="checkbox"/>
	Sewerage Management (Basic)							
<p>In order to improve the hygienic environment and reduce flood damages, it is essential to draft a plan and implement a project for appropriate sewage and urban drainage management. Through the lectures, site visit, and practices, participants will acquire basic knowledge and examine countermeasures against the issues they are facing and formulate Action Plan to develop master plan for its appropriate management. *In this program, we introduce "Active Learning" approach to promote knowledge co-creation among participants.</p>								
78	202003233	Environmental Management	Water Pollution	English		3yrs	1	<input type="checkbox"/>
	Water Environment Administration (Planning and Analysis)							
<p>Participants learn experience of pollution related to water environment, and sustainable preservation and utilization of water environment in Japan. Especially learn history and outline about preparation of legal structure. Based on it, learn roles of administration, private sector and citizens. Finally aims to enhance the ability for making and implementation of policy in participant's organization.</p>								
79	202003241	Environmental Management	Solid Waste Management	English		3yrs	1	<input type="checkbox"/>
	Development of Recycling Policy							
<p>To achieve sustainable economic growth in developing countries, there is a growing necessity for establishing a society with environmentally-sound material cycle by effective utilization of resources. For this purpose, industrial policy approach which promotes development of recycling industries essential. This course fosters talent to plan recycling policy through learning Japanese experience such as EPR. *In this program, we introduce "Active Learning" approach to promote knowledge co-creation among participants.</p>								

SHORT LIST

	PROJECT TITLE Outline							
70	202003208	Urban/Regional Development	Geographical Information	English		3yrs	1	<input type="checkbox"/>
	Management and Utilization of National Control Points for Efficiency of Survey This program is designed for human resources development for developing an appropriate operation and maintenance and utilization of National Control Points (e.g. CORS), which are necessary for the preparation and utilization of geospatial information. Participants are required to understand the operation, maintenance, and utilization of GNSS Earth Observation Network System (GEONET) in Japan, and are required to improve the operational method of the appropriate operation and maintenance and utilization of National Control Points (e.g. CORS) for its country. In addition, participants are required to acquire the method of operation of satellite positioning through practical trainings and to acquire the knowledge of geodetic system conversion and semi-dynamic correction.							
71	202003209	Urban/Regional Development	Geographical Information	English		1yr	1	<input type="checkbox"/>
	Planning and Management of National Mapping and Surveying Geospatial information is necessary infrastructure information for national development and disaster prevention. For achieving this, this program provide a training of core human resource in charge of planning and management of geospatial information, so that the target organization can manage reliable geospatial information properly and improve their future mapping policies.							
72	202003210	Urban/Regional Development	Other Urban &Regional Development Issues	English		3yrs	1	<input type="checkbox"/>
	Disaster Risk Reduction of Buildings Large disasters of earthquake have caused a lot of damages. Safe buildings are key to protect people's lives. Thus, Japanese government has made efforts to improve its building codes and the regulatory system to protect their people. Based on such experiences, this course aims to provide participants with knowledge on appropriate building codes and the regulatory system in order to support them to establish more resilient society. *In this program, we introduce "Active Learning" approach to promote knowledge co-creation among participants.							
73	202003212	Urban/Regional Development	Other Urban &Regional Development Issues	English		1yr	1	<input type="checkbox"/>
	National and Regional Development Policy Participants are supposed to be government officers engaged in national/regional development project/policy. They learn policies, strategies systems, and best practices in national & regional development plans as well as effective management of local & regional development. As the course output, they make a study report for the improvement of national/ regional development systems in relation to their on-going activities. Through these activities, this course aims to enhance their capacity of proposing concrete measures and solutions for improving their national/regional development policy/project by applying experiences and lessons in Japan.							
74	202003213	Urban/Regional Development	Other Urban &Regional Development Issues	English		2yrs	1	<input type="checkbox"/>
	Comprehensive Urban Transportation Planning Recently traffic congestion is one of the most serious issues in cities in developing countries. Urban transportation plan not only plays a vital role alleviating traffic congestion, but also greatly affects the determination of urban structure, thus it needs to be aligned with urban development plans. This course aims to acquire knowledge and skills on analysis of urban transportation issues based on traffic survey and formulation of transportation plans (including road and public transportation network, traffic management plans) based on demand forecast through seminars, site visits, workshops, and discussions. This course, the most basic course on urban transportation, focuses on knowledge necessary for urban transport master plan formulation. "Urban public transport" and "Urban Railways Management" are advanced course on urban transportation. *In this program, we introduce "Active Learning" approach to promote knowledge co-creation among participants.							

SHORT LIST

APPLICATION FORM FOR GROUP AND REGION-FOCUSED TRAINING PROGRAMS IN JAPANESE FISCAL YEAR 2021

Category II: These training courses are newly established or are on-going courses without fixed allocation and are widely accepting new participants

Country: THAILAND

Maximum Number of Requests : 41

No.	Project Number	Sector	Sub-Sector			Language	Fixed Allocation	Remaining Period	Desired No. of Participants	Request

80	202003244	Environmental Management	Solid Waste Management			English		1yr	1	<input type="checkbox"/>
			Strategic Utilization of Solid Waste Management Data							
			Solid waste management (SWM) data is very important for the officers in charge of SWM to understand the situation, to set the target, to enhance resident's understanding and cooperation. But, there are few good practices. This training course is designed for the SWM officers to study collection, methodology and analysis of SWM data such as waste generation, collection, recycling, disposal and composition.							
81	202003245	Environmental Management	Solid Waste Management			English		2yrs	1	<input type="checkbox"/>
			Technology for Solid Waste Management with Recycling Promotion for Sound Material-Cycle Society							
			This program is designed to improve Solid Waste Management (SWM) process comprehensively under the concept of Sound Material Cycle Society (SMCS) for participating countries and regions. It includes not only simple work of SWM, such as separate collection, transportation, intermediate processing and landfilling but also recycle based technology and practical example of SMCS carried out in Kitakyushu.							
82	202003247	Environmental Management	Solid Waste Management			English		2yrs	1	<input type="checkbox"/>
			Solid Waste Management towards Recycle Oriented Society (Emphasis on Partnership between Public Entities and Citizens)							
			Through lectures/field visits on the Japanese strategies and activities by governments (central and local), corporations, and communities, this course aims to clarify the issues and enhance the capacity of solid waste management, focusing on resource circulation, 3Rs, social awareness, and citizen participation. Participants will formulate action plans towards a sustainable recycle-oriented society.							
83	202003249	Environmental Management	Solid Waste Management			English		2yrs	1	<input type="checkbox"/>
			Enhancement of Solid Waste Management Capacity for Waste Power Generation							
			The purpose of this training course is to learn fundamental knowledge on waste power generation and on the required solid waste management necessary for waste power generation.							
84	202003250	Environmental Management	Solid Waste Management			English		2yrs	1	<input type="checkbox"/>
			Waste Management towards Control of Marine Litter							
			Marine litter is mainly generated inland and has negative impacts on marine environment and industries. To promote countermeasures globally, it is needed to supplement developing countries' experience in environmental management. The aim of this training is to enhance the understanding of latest Japanese and global efforts and measures to mitigate impacts by marine litter and create action plans for their own countries.							

SHORT LIST

APPLICATION FORM FOR GROUP AND REGION-FOCUSED TRAINING PROGRAMS IN JAPANESE FISCAL YEAR 2021

Category II: These training courses are newly established or are on-going courses without fixed allocation and are widely accepting new participants

Country: THAILAND

Maximum Number of Requests : 41

No.	Project Number	Sector	Sub-Sector	Language	Fixed Allocation	Remaining Period	Desired No. of Participants	Request
	PROJECT TITLE Outline							
85	202003262	Water Resources	Comprehensive Water Resources Management	English		3yrs	1	<input type="checkbox"/>
	Integrated Water Resources Management		This program is designed for an administrative officer to gain the knowledge and to plan countermeasures against Water Resources Management issues in the respective countries by applying the concept of Integrated Water Resources Management (IWRM). *In this program, we introduce "Active Learning" approach to promote knowledge co-creation among participants.					
86	202003266	Disaster Risk Reduction	Wind and Flood Disaster (Flood Control)	English		1yr	1	<input type="checkbox"/>
	Practical Methodology for Flood Control Planning and River Basin Management in Asia Region		The purpose of the program is to improve practical skills and sense for planning and implementation of flood control and river basin management through learning knowledge and experience on flood control and river basin management in Japan with actual case and model river.					
87	202003267	Disaster Risk Reduction	Wind and Flood Disaster (Flood Control)	English		1yr	1	<input type="checkbox"/>
	Flood Disaster Risk Reduction		This program aims to develop the participant's capacity to practically manage and mitigate damages of flood disasters and to contribute for socio-economic and environmental improvements at regional and national level in developing countries which suffer from them consistently.					
88	202003269	Disaster Risk Reduction	Soil and Water Disaster	English		2yrs	1	<input type="checkbox"/>
	Landslide Disaster Risk Reduction		Considering intensifying and frequent heavy rainfall by climate change effect, this course is designed for engineering officials or researchers in administrative organizations in order to enhance basic knowledge on disaster risk reduction (DRR) countermeasures for landslide including both structural measures and non-structural measures such as method of risk assessment, design of SABO dam, early warning and evacuation system achieved by a series of lectures, exercises, workshops and observations. Action plan on DRR countermeasures for landslide in participating country will be formulated as a one of the output of this program.					
89	202003271	Disaster Risk Reduction	Earthquake Disaster	English		3yrs	1	<input type="checkbox"/>
	Seismology, Earthquake Engineering and Tsunami Disaster Mitigation		Developing countries are vulnerable to threats of earthquakes and tsunamis. This course aims to increase capacities of officials, engineers or researchers who are conductive to earthquake and tsunami disaster management. In this course, participants will acquire Japan's leading knowledge and technologies on seismology, earthquake engineering and tsunami disaster mitigation.

	PROJECT TITLE							
90	202003273	Disaster Risk Reduction	Meteorology	English		2yrs	1	<input type="checkbox"/>
	Reinforcement of Meteorological Services							
The program aims to provide National Meteorological and Hydrological Services (NMHSs) with the relevant knowledge and key techniques (e.g. numerical weather prediction, satellite meteorology and climate information for advanced meteorological services) to improve their operational abilities.								
*In this program, we introduce 'Active Learning' approach to promote knowledge co-creation among participants.								
91	202003277	Disaster Risk Reduction	Comprehensive Disaster Risk Reduction	English		1yr	2	<input type="checkbox"/>
	Comprehensive Disaster Risk Reduction							
This Program is designed for officials in central and local governments who are responsible for mitigation and preparedness in the disaster management cycle. This Program provides opportunities to learn the accumulated experiences through past disasters in Japan, which are essentially reflected in the "Sendai Framework for Disaster Risk Reduction 2015-2030". Through this Program, including workshops on local disaster risk reduction (DRR) planning and lectures, participants are expected to gain practical knowledge and skill on disaster risk reduction (the basic knowledge, management skills, related technologies and systems with regards to DRR). This will also help the participants and the countries where the participants are from to achieve the global target (e) of the Sendai Framework for DRR. It should be noted that the global target (e) is expected to be achieved by 2020.								
92	202003281	Disaster Risk Reduction	Comprehensive Disaster Risk Reduction	English		2yrs	1	<input type="checkbox"/>
	Disaster Risk Reduction and Management on Infrastructure (River, Road and Port)							
In order to construct and maintain infrastructure properly, it is important to consider the risk of natural disasters at the planning stage. In this program, participants will learn measure and management method to prevent/reduce the damage of infrastructures from various types of natural disasters by managing the risks(Retention, Reduction, Avoidance and Transfer). And also participants will learn various technologies and how to manage projects for early recovery/reconstruction(Build Back Better) when the infrastructure facilities are damaged by natural disasters.								
93	202003289	Disaster Risk Reduction	Wind and Flood Disaster(Flood Control)	English		3yrs	1	<input type="checkbox"/>
	Dam Safety Management							
Japan has various knowledge on inspection to maintain the functions of dams and ensure their safety, as well as on dam upgrading to improve the functions of existing dams. The purpose of this training is to strengthen the practical ability and judgmental skills related to improving the safety and functions of dams in each country by learning about Japanese technologies for safety, operation improvement, and upgrading through lectures, practical training, and site visits. In addition, the trainees are expected to apply the knowledge gained in the training to their work after returning to their home countries, and to acquire abilities equivalent to field office managers responsible for maintenance, safety management, etc. of the dam (director level at the dam management office of the Ministry of Land, Infrastructure, Transport and Tourism of Japan) in the future.
